

## WEEKLY RETURN

OF

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

No. 1. Week ending SATURDAY, JANUARY 9, 1926. Price 2d. net.

The aggregate population of the Sixteen Principal Towns of Scotland is estimated as 2,378,900. In this estimate due allowance has been made for gains and losses by migration into and from Scotland, and for purposes of comparison the estimates of the populations of these towns for previous years have been revised on the same basis. (*Vide Table overleaf.*)

During the week ending 9th January 1926 there were registered in the Sixteen Principal Towns of Scotland the births of 1295 living children, the deaths of 854 persons, and 1152 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 815. The equivalent annual birth-rate is 28·4 per thousand, the marriage rate 25·3, and the death-rate (corrected) 17·9.

The birth-rate of the week is 5·4 more than that of the previous week, and 3·8 more than average. The marriage-rate of the week is 4·6 more than that of the previous week, but 0·1 below average. The death-rate of the week is 0·4 less than that of the previous week, but is 1·1 more than average.

The weekly death-rates in the individual towns averaged 16·0 and varied from 31·0 in Kirkealdy, and 20·6 in Perth, to 7·3 in Kilmarnock, and 10·5 in Hamilton. Relatively high weekly death-rates occurred in Glasgow (19·9), in Aberdeen (19·2), in Ayr (18·2), in Edinburgh (16·8) and in Dundee (16·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 51, and are 5 more than in the previous week. These deaths equal an annual death-rate of 1·1 per thousand. They include 21 from measles, 7 from scarlet fever, 8 from whooping-cough, 7 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the number in the previous week those from measles are 4 more, and from scarlet fever 3 more, but those from the diarrhoeas of childhood are similar, while those from whooping-cough and from diphtheria are each 1 fewer. In this as in the previous week there were no deaths from enteric fever.

Deaths from influenza numbered 8. This is 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 166, and equalled a death-rate of 3·6 per thousand. This death-rate is 0·2 less than that of the previous week, but is 0·1 more than average.

Deaths of children of less than one year old numbered 116, and those of persons of sixty-five and upwards 293. The former are 13 more, but the latter 19 fewer, than in the previous week.

Deaths attributed to violent causes numbered 32, and are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 41°·8, being 2°·2 above that for the previous week, and 1°·8 above that for the corresponding week of last year. The mean rainfall was 0·95 inch.

**NOTE.**—*The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 2. Week ending SATURDAY, JANUARY 16, 1926. Price 2d. net.**

---

During the week ending 16th January 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1033 living children, the deaths of 711 persons, and 223 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 700. The equivalent annual birth-rate is 22·6 per thousand, the marriage rate 4·9, and the death-rate (corrected) 15·3.

The birth-rate of the week is 5·8 less than in the previous week, and 1·9 below the average. The marriage-rate is 20·4 less than in the previous week, and 1·4 below the average. The death-rate is 2·6 less than in the previous week, and 1·0 below the average.

The weekly death-rates in the individual towns averaged 13·7 and varied from 20·7 in Kirkcaldy, and 18·4 in Dundee, to 7·9 in Hamilton, and 8·9 in Greenock. Relatively high death-rates occurred in Glasgow (17·4), in Coatbridge (17·3), in Kilmarnock (16·0), in Perth (15·8), and in Aberdeen (14·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29, and are 22 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include 9 from measles, 2 from scarlet fever, 4 from whooping-cough, 10 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 3 more, but those from whooping-cough and from the diarrhoeas of childhood are each 4 fewer, from scarlet fever 5 fewer, and from measles 12 fewer.

Deaths from influenza numbered 12. They are 4 more than in the previous week.

Deaths from respiratory diseases numbered 141, and equalled a death-rate of 3·1 per thousand. This death-rate is 0·5 less than in the previous week, and is 0·4 below the average.

Deaths of children of less than one year old numbered 95, and those of persons of sixty-five and upwards 234. The former are 21 fewer than in the previous week, and the latter are 59 fewer.

Deaths attributed to violent causes numbered 32, and numbered the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·7, being 2°·1 below that for the previous week, and 4°·7 below that for the corresponding week of last year. The mean rainfall was 0·74 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN OF Births, Deaths, and Marriages

## IN THE Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 3. Week ending SATURDAY, JANUARY 23, 1926. Price 2d. net.**

---

During the week ending 23rd January 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1005 living children, the deaths of 751 persons, and 206 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 717. The equivalent annual birth-rate is 22·0 per thousand, the marriage-rate 4·5, and the death-rate (corrected) 15·7.

The birth-rate of the week is 0·6 less than in the previous week, and 2·0 below the average. The marriage-rate is 0·4 less than in the previous week, and 0·2 below the average. The death-rate is 0·4 more than in the previous week, but 1·5 below the average.

The weekly death-rate in the individual towns averaged 14·6 and varied from 18·9 in Kilmarnock and 17·8 in Dunfermline, to 9·6 in Motherwell and Wishaw, and 9·8 in Ayr. Relatively high death-rates occurred in Perth (17·4), in Glasgow (17·2), in Hamilton (17·1), in Dundee (16·5), in Greenock (16·0), and in Edinburgh and in Paisley (15·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 40, and are 11 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·9 per thousand. They include 1 from enteric fever, 17 from measles, 2 from scarlet fever, 8 from whooping-cough, 4 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the numbers in the previous week, deaths from measles are 8 more, those from whooping-cough and from the diarrhoeas of childhood are each 4 more, and those from enteric fever are 1 more, but those from scarlet fever number the same and those from diphtheria are 6 fewer.

Deaths from influenza numbered 12. They number the same as in the previous week.

Deaths from respiratory diseases numbered 124, and equalled an annual death-rate of 2·7 per thousand. This death-rate is 0·4 less than in the previous week, and is 0·7 below the average.

Deaths of children of less than one year old numbered 97, and those of persons of sixty-five and upwards 255. The former are 2 more than in the previous week, and the latter are 21 more.

Deaths attributed to violent causes numbered 26, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·7, being 2°·0 below that for the previous week, and 3°·1 below that for the corresponding week of last year. The mean rainfall was 1·90 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**WEEKLY RETURN**  
OF  
**Births, Deaths, and Marriages**  
IN THE  
**Principal Towns of Scotland**

*By Authority of the Registrar-General*

---

**No. 4.      Week ending SATURDAY, JANUARY 30, 1926.      Price 2d. net.**

---

During the week ending 30th January 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1014 living children, the deaths of 696 persons, and 236 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 660. The equivalent annual birth-rate is 22·2 per thousand, the marriage-rate 5·2, and the death-rate (corrected) 14·5.

The birth-rate of the week is 0·2 more than in the previous week, but 1·3 below the average. The marriage-rate is 0·7 more than in the previous week, but is the same as the average. The death-rate is 1·2 less than in the previous week, and 2·1 below the average.

The weekly death-rate in the individual towns averaged 13·1 and varied from 19·7 in Hamilton and 19·6 in Coatbridge, to 4·6 in Falkirk and 7·9 in Clydebank. Relatively high death-rates occurred in Dundee (16·5), in Paisley (16·2), in Glasgow (16·1), in Perth (15·8), in Ayr (14·0), and in Aberdeen (13·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34, and are 6 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from enteric fever, 21 from measles, 3 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, and 2 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 4 more, and from scarlet fever 1 more, while those from diphtheria numbered the same, from whooping-cough 4 fewer, and from the diarrhoeas of childhood 6 fewer.

Deaths from influenza numbered 7, and are 5 fewer than in the previous week.

Deaths from respiratory diseases numbered 119, and equalled an annual death-rate from these causes of 2·6 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·7 below the average.

Deaths of children of less than one year old numbered 106, and those of persons of sixty-five and upwards 236. The former are 9 more than in the previous week, but the latter are 19 fewer.

Deaths attributed to violent causes numbered 20, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·7, being 5°·0 above that for the previous week, and 2°·7 above that for the corresponding week of last year. The mean rainfall was 1·19 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 6. Week ending SATURDAY, FEBRUARY 13, 1926. Price 2d. net.**

---

During the week ending 13th February 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1054 living children, the deaths of 706 persons, and 297 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 662. The equivalent annual birth-rate is 23·1 per thousand, the marriage-rate 6·5, and the death-rate (corrected) 14·5.

The birth-rate of the week is 0·2 more than in the previous week, but 1·2 below the average. The marriage-rate is 0·3 less than in the previous week, but 0·4 above the average. The death-rate is 0·4 less than in the previous week, and 1·6 below the average.

The weekly death-rate in the individual towns averaged 13·3 and varied from 19·6 in Coatbridge and 19·4 in Kirkcaldy, to 5·1 in Dunfermline and 7·3 in Kilmarnock. Relatively high death-rates occurred in Dundee (16·8), in Perth (15·8), in Glasgow (15·7), in Aberdeen (14·9), and in Clydebank (13·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 57, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 1·2 per thousand. They include none from enteric fever, 34 from measles, 4 from scarlet fever, 4 from whooping-cough, 9 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 3 more, and from measles 2 more, but those from whooping-cough and the diarrhoeas of childhood are each 1 fewer, and from scarlet fever 2 fewer.

Deaths from influenza numbered 5, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 123, and equalled an annual death-rate from these causes of 2·7 per thousand. This death-rate is the same as in the previous week, but is 0·8 below the average.

Deaths of children of less than one year old numbered 106, and those of persons of sixty-five and upwards 197. The former are 5 more than in the previous week, but the latter are 31 fewer.

Deaths attributed to violent causes numbered 29, and are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 35°·3, being 4°·7 below that for the previous week, and 3°·9 below that for the corresponding week of last year. The mean rainfall was 0·63 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 7. Week ending SATURDAY, FEBRUARY 20, 1926. Price 2d. net.**

---

During the week ending 20th February 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1046 living children, the deaths of 727 persons, and 269 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 690. The equivalent annual birth-rate is 22·9 per thousand, the marriage-rate 5·9, and the death-rate (corrected) 15·1.

The birth-rate of the week is 0·2 less than in the previous week, and 2·2 below the average. The marriage-rate is 0·6 less than in the previous week, but 0·1 above the average. The death-rate is 0·6 more than in the previous week, but 1·0 below the average.

The weekly death-rate in the individual towns averaged 13·6 and varied from 19·8 in Greenock and 19·6 in Ayr, to 5·8 in Kilmarnock and 6·8 in Clydebank. Relatively high death-rates occurred in Kirkcaldy (18·1), in Hamilton (17·1), in Dundee (16·5), in Edinburgh (16·3), in Coatbridge (16·2), in Glasgow (15·7), and in Aberdeen 14·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 66, and are 9 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·4 per thousand. They include none from enteric fever, 40 from measles, 5 from scarlet fever, 12 from whooping-cough, 4 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 8 more, from measles 6 more, and from scarlet fever 1 more, but those from the diarrhoeas of childhood are 1 fewer, and those from diphtheria 5 fewer.

Deaths from influenza numbered 5, and are the same as in the previous week.

Deaths from respiratory diseases numbered 128, and equalled an annual death-rate from these causes of 2·8 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·3 below the average.

Deaths of children of less than one year old numbered 97, and those of persons of sixty-five and upwards 231. The former are 9 fewer than in the previous week, but the latter are 34 more.

Deaths attributed to violent causes numbered 26, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 41°·7, being 6°·4 above that for the previous week, and 2°·9 above that for the corresponding week of last year. The mean rainfall was 1·34 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 8. Week ending SATURDAY, FEBRUARY 27, 1926. Price 2d. net.**

---

During the week ending 27th February 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1058 living children, the deaths of 777 persons, and 293 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 745. The equivalent annual birth-rate is 23·2 per thousand, the marriage-rate 6·4, and the death-rate (corrected) 16·3.

The birth-rate of the week is 0·2 more than in the previous week, but 1·6 below the average. The marriage-rate is 0·5 more than in the previous week, and 0·2 above the average. The death-rate is 1·2 more than in the previous week, but 1·2 below the average.

The weekly death-rate in the individual towns averaged 14·5 and varied from 20·6 in Perth and 18·6 in Paisley, to 7·7 in Greenock and 7·9 in Clydebank. Relatively high death-rates occurred in Glasgow 18·2, in Kirkcaldy 18·1, in Dundee 17·5, in Hamilton 17·1, in Falkirk 16·7, in Edinburgh 16·6, and in Coatbridge 15·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 73, and are 7 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·6 per thousand. They include 1 from enteric fever, 46 from measles, 4 from scarlet fever, 6 from whooping-cough, 6 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 6 more, from the diarrhoeas of childhood 5 more, from diphtheria 2 more, and from enteric fever 1 more, but those from scarlet fever are 1 fewer, and those from whooping-cough 6 fewer.

Deaths from influenza numbered 16, and are 11 more than in the previous week.

Deaths from respiratory diseases numbered 137, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·6 below the average.

Deaths of children of less than one year old numbered 120, and those of persons of sixty-five and upwards 238. The former are 23 more than in the previous week, and the latter are 6 more.

Deaths attributed to violent causes numbered 31, and are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 47°·2, being 5°·5 above that for the previous week, and 9°·1 above that for the corresponding week of last year. The mean rainfall was 1·07 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 9.      Week ending SATURDAY, MARCH 6, 1926.      Price 2d. net.**

---

During the week ending 6th March 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 999 living children, the deaths of 702 persons, and 343 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 677. The equivalent annual birth-rate is 21·9 per thousand, the marriage-rate 7·5, and the death-rate (corrected) 14·8.

The birth-rate of the week is 1·3 less than in the previous week, and 2·3 below the average. The marriage-rate is 1·1 more than in the previous week, and 0·2 above the average. The death-rate is 1·5 less than in the previous week, and 2·6 below the average.

The weekly death-rate in the individual towns averaged 11·8 and varied from 19·6 in Edinburgh and 18·2 in Falkirk, to 5·2 in Kirkcaldy and 5·6 in Ayr. Relatively high death-rates occurred in Glasgow (15·4), in Paisley (15·0), in Coatbridge (15·0), in Dundee (14·1), in Aberdeen (13·9), and in Kilmarnock (13·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 65, and are 8 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·4 per thousand. They include none from enteric fever, 28 from measles, 8 from scarlet fever, 9 from whooping-cough, 13 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 7 more, from scarlet fever 4 more, and from whooping-cough 3 more, but those from the diarrhoeas of childhood are 3 fewer, and from measles 18 fewer.

Deaths from influenza numbered 14, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 136, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is the same as in the previous week, but is 1·1 below the average.

Deaths of children of less than one year old numbered 90, and those of persons of sixty-five and upwards 213. The former are 30 fewer than in the previous week, and the latter are 25 fewer.

Deaths attributed to violent causes numbered 16, and are 15 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·6, being 3°·6 below that for the previous week, but 3°·0 above that for the corresponding week of last year. The mean rainfall was 1·01 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

IN THE  
**Principal Towns of Scotland**

*By Authority of the Registrar-General*

---

No. 10.      Week ending SATURDAY, MARCH 13, 1926.      Price 2d. net.

---

During the week ending 13th March 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1096 living children, the deaths of 723 persons, and 233 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 691. The equivalent annual birth-rate is 24·0 per thousand, the marriage-rate 5·1, and the death-rate (corrected) 15·1.

The birth-rate of the week is 2·1 more than in the previous week, and 0·4 above the average. The marriage-rate is 2·4 less than in the previous week, and 2·0 below the average. The death-rate is 0·3 more than in the previous week, but 3·2 below the average.

The weekly death-rate in the individual towns averaged 14·2 and varied from 18·2 in Falkirk and 18·1 in Clydebank, to 9·6 in Motherwell and Wishaw, and 11·1 in Perth. Relatively high death-rates occurred in Edinburgh (17·9), in Dumfermline (17·8), in Glasgow (15·4), in Ayr (15·4) and in Paisley (14·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55, and are 10 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·2 per thousand. They include none from enteric fever, 32 from measles, 5 from scarlet fever, 9 from whooping-cough, 5 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 4 more, while those from whooping-cough number the same, but those from scarlet fever are 3 fewer, from the diarrhoeas of childhood 3 fewer, and from diphtheria 8 fewer.

Deaths from influenza numbered 13, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 133, and equalled an annual death-rate from these causes of 2·9 per thousand. This death-rate is 0·1 less than in the previous week, and is 1·7 below the average.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 237. The former are 18 more than in the previous week, and the latter are 24 more.

Deaths attributed to violent causes numbered 26, and are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 46°·1, being 2°·5 above that for the previous week, and 8°·4 above that for the corresponding week of last year. The mean rainfall was 0·99 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 11.      Week ending SATURDAY, MARCH 20, 1926.      Price 2d. net.**

---

During the week ending 20th March 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1123 living children, the deaths of 787 persons, and 210 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 752. The equivalent annual birth-rate is 24·6 per thousand, the marriage-rate 4·6, and the death-rate (corrected) 16·5.

The birth-rate of the week is 0·6 more than in the previous week, and 0·3 above the average. The marriage-rate is 0·5 less than in the previous week, and 0·6 below the average. The death-rate is 1·4 more than in the previous week, but 2·2 below the average.

The weekly death-rate in the individual towns averaged 14·4 and varied from 24·2 in Coatbridge and 20·3 in Kilmarnock, to 7·6 in Falkirk and 8·4 in Ayr. Relatively high death-rates occurred in Greenock (19·2), in Glasgow (18·1), in Edinburgh (17·1), in Paisley (16·8) and in Hamilton (14·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 80, and are 25 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·8 per thousand. They include none from enteric fever, 42 from measles, 9 from scarlet fever, 6 from whooping-cough, 11 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 10 more, from the diarrhoeas of childhood 8 more, from diphtheria 6 more, and from scarlet fever 4 more, while from whooping-cough they are 3 fewer.

Deaths from influenza numbered 12, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 138, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is 0·1 more than in the previous week, but is 1·2 below the average.

Deaths of children of less than one year old numbered 121, and those of persons of sixty-five and upwards 234. The former are 13 more than in the previous week, but the latter are 3 fewer.

Deaths attributed to violent causes numbered 23, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·0, being 2°·1 below that for the previous week, and 0°·2 below that for the corresponding week of last year. The mean rainfall was 0·07 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 12.      Week ending SATURDAY, MARCH 27, 1926.      Price 2d. net.**

---

During the week ending 27th March 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1080 living children, the deaths of 848 persons, and 234 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 818. The equivalent annual birth-rate is 23·7 per thousand, the marriage-rate 5·1, and the death-rate (corrected) 17·9.

The birth-rate of the week is 0·9 less than in the previous week, and 0·6 below the average. The marriage-rate is 0·5 more than in the previous week, but 0·6 below the average. The death-rate is 1·4 more than in the previous week, but the same as the average.

The weekly death-rate in the individual towns averaged 12·7 and varied from 23·7 in Glasgow and 20·3 in Kilmarnock, to 6·5 in Kirkcaldy and 6·6 in Hamilton. Relatively high death-rates occurred in Edinburgh (17·3), in Coatbridge (16·2), in Perth (15·8), in Clydebank (14·7), in Dundee (13·8), and in Greenock (13·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 62, and are 18 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·4 per thousand. They include none from enteric fever, 37 from measles, 7 from scarlet fever, 8 from whooping-cough, 6 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 2 more, but those from scarlet fever are 2 fewer, from measles 5 fewer, from diphtheria 5 fewer, and from the diarrhoeas of childhood 8 fewer.

Deaths from influenza numbered 31, and are 19 more than in the previous week.

Deaths from respiratory diseases numbered 207, and equalled an annual death-rate from these causes of 4·5 per thousand. This death-rate is 1·5 more than in the previous week, and is 0·3 above the average.

Deaths of children of less than one year old numbered 120, and those of persons of sixty-five and upwards 254. The former are 1 fewer than in the previous week, but the latter are 20 more.

Deaths attributed to violent causes numbered 24, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·1, being 4°·9 below that for the previous week, and 0°·9 below that for the corresponding week of last year. The mean rainfall was 0·13 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 13.      Week ending SATURDAY, APRIL 3, 1926.      Price 2d. net.

---

During the week ending 3rd April 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 960 living children, the deaths of 1052 persons, and 298 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 1023. The equivalent annual birth-rate is 21·0 per thousand, the marriage-rate 6·5, and the death-rate (corrected) 22·4.

The birth-rate of the week is 2·7 less than in the previous week, and 3·0 below the average. The marriage-rate is 1·4 more than in the previous week, and 0·1 above the average. The death-rate is 4·5 more than in the previous week, and 5·1 above the average.

The weekly death-rate in the individual towns averaged 17·3 and varied from 31·0 in Glasgow and 20·8 in Coatbridge, to 10·6 in Falkirk and 12·6 in Edinburgh. Relatively high death-rates occurred in Motherwell and Wishaw (19·9), in Dundee (19·6), in Kirkcaldy (19·4), in Ayr (18·2), in Paisley (18·0), and in Kilmarnock (17·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 74, and are 12 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·6 per thousand. They include none from enteric fever, 38 from measles, 7 from scarlet fever, 15 from whooping-cough, 7 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 7 more, from the diarrhoeas of childhood 3 more, from measles 1 more, and from diphtheria 1 more, but those from scarlet fever number the same.

Deaths from influenza numbered 81, and are 50 more than in the previous week.

Deaths from respiratory diseases numbered 263, and equalled an annual death-rate from these causes of 5·8 per thousand. This death-rate is 1·3 more than in the previous week, and is 2·0 above the average.

Deaths of children of less than one year old numbered 173, and those of persons of sixty-five and upwards 333. The former are 53 more than in the previous week, and the latter are 79 more.

Deaths attributed to violent causes numbered 22, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·6, being 6°·5 above that for the previous week, and 5°·0 above that for the corresponding week of last year. The mean rainfall was 0·60 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 14.      Week ending SATURDAY, APRIL 10, 1926.      Price 2d. net.**

---

During the week ending 10th April 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1189 living children, the deaths of 976 persons, and 519 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 956. The equivalent annual birth-rate is 26·1 per thousand, the marriage-rate 11·4, and the death-rate (corrected) 21·0.

The birth-rate of the week is 5·1 more than in the previous week, and 2·3 above the average. The marriage-rate is 4·9 more than in the previous week, and 1·8 above the average. The death-rate is 1·4 less than in the previous week, but 3·6 above the average.

The weekly death-rate in the individual towns averaged 18·5 and varied from 30·3 in Hamilton and 27·5 in Greenock, to 11·1 in Perth and 11·6 in Kirkcaldy. Relatively high death-rates occurred in Paisley (27·1), in Glasgow (25·6), in Clydebank (20·3), in Aberdeen (20·2), and in Coatbridge (18·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 76, and are 2 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·7 per thousand. They include 1 from enteric fever, 30 from measles, 7 from scarlet fever, 18 from whooping-cough, 11 from diphtheria, and 9 from the diarrhœas of childhood. Compared with the number in the previous week, deaths from diphtheria are 4 more, from whooping-cough 3 more, from the diarrhœas of childhood 2 more, and from enteric fever 1 more, while those from scarlet fever number the same, and those from measles are 8 fewer.

Deaths from influenza numbered 115, and are 34 more than in the previous week.

Deaths from respiratory diseases numbered 270, and equalled an annual death-rate from these causes of 5·9 per thousand. This death-rate is 0·1 more than in the previous week, and is 2·1 above the average.

Deaths of children of less than one year old numbered 141, and those of persons of sixty-five and upwards 350. The former are 32 fewer than in the previous week, but the latter are 17 more.

Deaths attributed to violent causes numbered 26, and are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·0, being 4°·4 above that for the previous week, and 5°·3 above that for the corresponding week of last year. The mean rainfall was 0·05 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 15.      Week ending SATURDAY, APRIL 17, 1926.      Price 2d. net.**

---

During the week ending 17th April 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1169 living children, the deaths of 987 persons, and 377 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 951. The equivalent annual birth-rate is 25·6 per thousand, the marriage-rate 8·3, and the death-rate (corrected) 20·8.

The birth-rate of the week is 0·5 less than in the previous week, and 0·4 below the average. The marriage-rate is 3·1 less than in the previous week, and 0·8 below the average. The death-rate is 0·2 less than in the previous week, but 4·4 above the average.

The weekly death-rate in the individual towns averaged 19·8 and varied from 31·3 in Greenock and 28·9 in Paisley, to 11·6 in Kilmarnock and 14·0 in Ayr. Relatively high death-rates occurred in Dundee (23·3), in Glasgow (22·8), in Hamilton (22·4), in Motherwell and Wishaw (21·3), and in Clydebank (20·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 83, and are 7 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·8 per thousand. They include none from enteric fever, 41 from measles, 7 from scarlet fever, 13 from whooping-cough, 13 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 11 more, and those from diphtheria 2 more, but those from scarlet fever and from the diarrhoeas of childhood each number the same, those from enteric fever are 1 fewer, and those from whooping-cough are 5 fewer.

Deaths from influenza numbered 84, and are 31 fewer than in the previous week.

Deaths from respiratory diseases numbered 234, and equalled an annual death-rate from these causes of 5·1 per thousand. This death-rate is 0·8 less than in the previous week, but is 2·0 above the average.

Deaths of children of less than one year old numbered 144, and those of persons of sixty-five and upwards 285. The former are 3 more than in the previous week, but the latter are 65 fewer.

Deaths attributed to violent causes numbered 39, and are 13 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 46°·4, being 3°·6 below that for the previous week, but 1°·8 above that for the corresponding week of last year. The mean rainfall was 0·77 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

## Principal Towns of Scotland

*By Authority of the Registrar-General*

**No. 16.      Week ending SATURDAY, APRIL 24, 1926.      Price 2d. net.**

During the week ending 24th April 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1076 living children, the deaths of 820 persons, and 278 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 782. The equivalent annual birth-rate is 23·6 per thousand, the marriage-rate 6·1, and the death-rate (corrected) 17·1.

The birth-rate of the week is 2·0 less than in the previous week, and 1·0 below the average. The marriage-rate is 2·2 less than in the previous week, and 1·5 below the average. The death-rate is 3·7 less than in the previous week, but 1·6 above the average.

The weekly death-rate in the individual towns averaged 16·2 and varied from 27·5 in Greenock, 23·5 in Paisley, and 23·1 in Coatbridge, to 8·9 in Dunfermline, 9·0 in Clydebank and 9·1 in Falkirk. Relatively high death-rates occurred in Dundee (19·9), in Perth (19·0), in Glasgow (17·9), and in Aberdeen (17·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 61, and are 22 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·3 per thousand. They include none from enteric fever, 25 from measles, 5 from scarlet fever, 14 from whooping-cough, 13 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 1 more, while those from diphtheria number the same, but those from scarlet fever are 2 fewer, from the diarrhoeas of childhood 5 fewer, and from measles 16 fewer.

Deaths from influenza numbered 54, and are 30 fewer than in the previous week.

Deaths from respiratory diseases numbered 156, and equalled an annual death-rate from these causes of 3·4 per thousand. This death-rate is 1·7 less than in the previous week, but is 0·7 above the average.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 236. The former are 36 fewer than in the previous week, and the latter are 49 fewer.

Deaths attributed to violent causes numbered 21, and are 18 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·2, being 1°·2 below that for the previous week, but 0°·7 above that for the corresponding week of last year. The mean rainfall was 0·48 inch.

**NOTE.**—*The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

During the week ending 1st May 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1171 living children, the deaths of 749 persons, and 446 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 726. The equivalent annual birth-rate is 25·7 per thousand, the marriage-rate 9·8, and the death-rate (corrected) 15·9.

The birth-rate of the week is 2·1 more than in the previous week, but 0·3 below the average. The marriage-rate is 3·7 more than in the previous week, but 2·7 below the average. The death-rate is 1·2 less than in the previous week, but 0·7 above the average.

The weekly death-rate in the individual towns averaged 15·6 and varied from 21·1 in Hamilton, and 19·5 in Aberdeen, to 10·3 in Kirkcaldy, and 10·6 in Falkirk. Relatively high death-rates occurred in Greenock (19·2), in Dunfermline (17·8), in Kilmarnock (17·4), in Dundee (17·2), in Motherwell and Wishaw (16·9), in Glasgow (16·7), in Paisley (16·2), and in Perth (15·8).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49, and are 12 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·1 per thousand. They include 1 from enteric fever, 29 from measles, 1 from scarlet fever, 8 from whooping-cough, 3 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 4 more, from the diarrhoeas of childhood 3 more, and from enteric fever 1 more, but those from scarlet fever are 4 fewer, from whooping-cough 6 fewer, and from diphtheria 10 fewer.

Deaths from influenza numbered 27, and are 27 fewer than in the previous week.

Deaths from respiratory diseases numbered 140, and equalled an annual death-rate from these causes of 3·1 per thousand. This death-rate is 0·3 less than in the previous week, but is 0·7 above the average.

Deaths of children of less than one year old numbered 107, and those of persons of sixty-five and upwards 249. The former are 1 fewer than in the previous week, but the latter are 13 more.

Deaths attributed to violent causes numbered 27, and are 6 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·9, being 0°·7 above that for the previous week, and 2°·4 above that for the corresponding week of last year. The mean rainfall was 0·68 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 18.**      **Week ending SATURDAY, MAY 8, 1926.**      **Price 2d. net.**

---

During the week ending 8th May 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1055 living children, the deaths of 727 persons, and 355 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 691. The equivalent annual birth-rate is 23·1 per thousand, the marriage-rate 7·8, and the death-rate (corrected) 15·1.

The birth-rate of the week is 2·6 less than in the previous week, and 2·5 below the average. The marriage-rate is 2·0 less than in the previous week, and 1·9 below the average. The death-rate is 0·8 less than in the previous week, but 0·3 above the average.

The weekly death-rate in the individual towns averaged 16·2 and varied from 26·3 in Hamilton, and 20·6 in Perth, to 10·2 in Clydebank, and 10·6 in Falkirk. Relatively high death-rates occurred in Ayr (19·6), in Kirkcaldy (19·4), in Motherwell and Wishaw (16·9), in Paisley (16·8), and in Greenock (16·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 43, and are 6 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·9 per thousand. They include none from enteric fever, 21 from measles, 5 from scarlet fever, 6 from whooping-cough, 5 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 4 more, and from diphtheria 2 more, but those from the diarrhoeas of childhood are 1 fewer, from whooping-cough 2 fewer, and from measles 8 fewer.

Deaths from influenza numbered 25, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 123, and equalled an annual death-rate from these causes of 2·7 per thousand. This death-rate is 0·4 less than in the previous week, but is 0·1 above the average.

Deaths of children of less than one year old numbered 98, and those of persons of sixty-five and upwards 234. The former are 9 fewer than in the previous week, and the latter are 15 fewer.

Deaths attributed to violent causes numbered 29, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·1, being 1°·8 below that for the previous week, and 3°·8 below that for the corresponding week of last year. The mean rainfall was 0·65 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 19.**      **Week ending SATURDAY, MAY 15, 1926.**      **Price 2d. net.**

---

During the week ending 15th May 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,378,900, the births of 1116 living children, the deaths of 662 persons, and 111 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 623. The equivalent annual birth-rate is 24·5 per thousand, the marriage-rate 2·4, and the death-rate (corrected) 13·7.

The birth-rate of the week is 1·4 more than in the previous week, but 1·5 below the average. The marriage-rate is 5·4 less than in the previous week, and 0·5 below the average. The death-rate is 1·4 less than in the previous week, and 0·7 below the average.

The weekly death-rate in the individual towns averaged 12·6 and varied from 28·9 in Coatbridge, and 19·2 in Greenock, to 6·3 in Dunfermline, and 6·8 in Clydebank. Relatively high death-rates occurred in Glasgow (14·6), in Kilmarnock (14·5), in Ayr (14·0), in Aberdeen (13·9), in Edinburgh (13·1), and in Dundee (12·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26, and are 17 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from enteric fever, 15 from measles, 1 from scarlet fever, 4 from whooping-cough, 2 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 6 fewer, from scarlet fever 4 fewer, from diphtheria 3 fewer, from whooping-cough 2 fewer, and from the diarrhoeas of childhood 2 fewer.

Deaths from influenza numbered 17, and are 8 fewer than in the previous week.

Deaths from respiratory diseases numbered 85, and equalled an annual death-rate from these causes of 1·9 per thousand. This death-rate is 0·8 less than in the previous week, and is 0·5 below the average.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 224. The former are 22 fewer than in the previous week, and the latter are 10 fewer.

Deaths attributed to violent causes numbered 32, and are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·2, being 1°·1 above that for the previous week, but 5°·9 below that for the corresponding week of last year. The mean rainfall was 0·71 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 20.**      **Week ending SATURDAY, MAY 22, 1926.**      **Price 2d. net.**

---

During the week ending 22nd May 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 989 living children, the deaths of 693 persons, and 113 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 666. The equivalent annual birth-rate is 21·5 per thousand, the marriage-rate 2·5, and the death-rate (corrected) 14·5.

The birth-rate of the week is 3·0 less than in the previous week, and 3·1 below the average. The marriage-rate is 0·1 more than in the previous week, but 0·2 below the average. The death-rate is 0·8 more than in the previous week, and 0·1 above the average.

The weekly death-rate in the individual towns averaged 15·3, and varied from 22·8 in Falkirk and 21·1 in Hamilton, to 8·9 in Dunfermline and 9·0 in Clydebank. Relatively high death-rates occurred in Kirkcaldy (20·7), in Paisley (18·0), in Coatbridge (17·3), in Ayr (16·8), and in Dundee 16·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 40, and are 14 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·9 per thousand. They include none from enteric fever, 11 from measles, 5 from scarlet fever, 11 from whooping-cough, 6 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 7 more, from scarlet fever 4 more, from diphtheria 4 more, and from the diarrhoeas of childhood 3 more, but those from measles are 4 fewer.

Deaths from influenza numbered 15, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 102, and equalled an annual death-rate from these causes of 2·2 per thousand. This death-rate is 0·3 more than in the previous week, but is the same as the average.

Deaths of children of less than one year old numbered 86, and those of persons of sixty-five and upwards 214. The former are 10 more than in the previous week, but the latter are 10 fewer.

Deaths attributed to violent causes numbered 26, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 48°·7, being 3°·5 above that for the previous week, but 4°·1 below that for the corresponding week of last year. The mean rainfall was 0·23 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

WEEKLY RETURN  
OF  
Births, Deaths, and Marriages  
IN THE  
Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 21.      Week ending SATURDAY, MAY 29, 1926.      Price 2d. net.

---

During the week ending 29th May 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1004 living children, the deaths of 657 persons, and 117 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 624. The equivalent annual birth-rate is 21·8 per thousand, the marriage-rate 2·5, and the death-rate (corrected) 13·6.

The birth-rate of the week is 0·3 more than in the previous week, but 2·7 below the average. The marriage-rate is the same as in the previous week, but 0·3 below the average. The death-rate is 0·9 less than in the previous week, but 0·4 above the average.

The weekly death-rate in the individual towns averaged 13·5, and varied from 23·3 in Kilmarnock and 17·9 in Greenock, to 9·0 in Clydebank and 9·6 in Motherwell and Wishaw. Relatively high death-rates occurred in Hamilton (17·1), in Paisley (15·6), in Dunfermline (15·2), and in Glasgow (14·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 31, and are 9 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from enteric fever, 13 from measles, 4 from scarlet fever, 2 from whooping-cough, 6 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 2 more, while those from diphtheria number the same, and those from scarlet fever are 1 fewer, from the diarrhoeas of childhood 1 fewer, and from whooping-cough 9 fewer.

Deaths from influenza numbered 6, and are 9 fewer than in the previous week.

Deaths from respiratory diseases numbered 104, and equalled an annual death-rate from these causes of 2·3 per thousand. This death-rate is 0·1 more than in the previous week, and is 0·3 above the average.

Deaths of children of less than one year old numbered 78, and those of persons of sixty-five and upwards 234. The former are 8 fewer than in the previous week, but the latter are 20 more.

Deaths attributed to violent causes numbered 26, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·0, being 6°·3 above that for the previous week, and 3°·9 above that for the corresponding week of last year. The mean rainfall was 0·73 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 22.**      **Week ending SATURDAY, JUNE 5, 1926.**      **Price 2d. net.**

---

During the week ending 5th June 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1000 living children, the deaths of 637 persons, and 375 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 603. The equivalent annual birth-rate is 21·8 per thousand, the marriage-rate 8·2, and the death-rate (corrected) 13·1.

The birth-rate of the week is the same as in the previous week, but 3·5 below the average. The marriage-rate is 5·7 more than in the previous week, and 2·3 above the average. The death-rate is 0·5 less than in the previous week, but 0·2 below the average.

The weekly death-rate in the individual towns averaged 12·8, and varied from 21·0 in Paisley, 17·2 in Greenock and 17·1 in Hamilton, to 7·8 in Kirkcaldy and 8·4 in Ayr. Relatively high death-rates occurred in Coatbridge (16·2), in Aberdeen (14·9), and in Edinburgh (13·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 33, and are 2 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include 1 from enteric fever, 8 from measles, 5 from scarlet fever, 7 from whooping-cough, 4 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 5 more, from the diarrhoeas of childhood 2 more, and from enteric fever and from scarlet fever each 1 more, but those from diphtheria are 2 fewer, and from measles 5 fewer.

Deaths from influenza numbered 6, and number the same as in the previous week.

Deaths from respiratory diseases numbered 83, and equalled an annual death-rate from these causes of 1·8 per thousand. This death-rate is 0·5 less than in the previous week, but is the same as the average.

Deaths of children of less than one year old numbered 75, and those of persons of sixty-five and upwards 192. The former are 3 fewer than in the previous week, and the latter are 42 fewer.

Deaths attributed to violent causes numbered 38, and are 12 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·3, being 2°·7 below that for the previous week, and 2°·3 below that for the corresponding week of last year. The mean rainfall was 0·49 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 23.      Week ending SATURDAY, JUNE 12, 1926.      Price 2d. net.**

---

During the week ending 12th June 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1097 living children, the deaths of 570 persons, and 532 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 542. The equivalent annual birth-rate is 23·9 per thousand, the marriage-rate 11·6, and the death-rate (corrected) 11·8.

The birth-rate of the week is 2·1 more than in the previous week, but 0·5 below the average. The marriage-rate is 3·4 more than in the previous week, but 1·3 below the average. The death-rate is 1·3 less than in the previous week, and 1·8 below the average.

The weekly death-rate in the individual towns averaged 10·2, and varied from 16·0 in Kilmarnock, 12·8 in Glasgow, and 12·7 in Coatbridge, to 4·5 in Clydebank, 6·1 in Falkirk, and 6·3 in Perth. Relatively high death-rates occurred in Edinburgh (12·4), in Greenock (12·1), in Paisley (12·0), in Dundee (11·3), in Aberdeen (10·6), and in Hamilton (10·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26, and are 7 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from enteric fever, 6 from measles, 2 from scarlet fever, 8 from whooping-cough, 4 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough number 1 more, and those from diphtheria number the same, but those from enteric fever are 1 fewer, from measles and from the diarrhoeas of childhood each 2 fewer, and from scarlet fever 3 fewer.

Deaths from influenza numbered 2, and are 4 fewer than in the previous week.

Deaths from respiratory diseases numbered 53, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·6 less than in the previous week, and is 0·7 below the average.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 188. The former are 2 fewer than in the previous week, and the latter are 4 fewer.

Deaths attributed to violent causes numbered 22, and are 16 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·9, being 3°·6 above that for the previous week, but 3°·4 below that for the corresponding week of last year. The mean rainfall was 1·62 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 24.      Week ending SATURDAY, JUNE 19, 1926.      Price 2d. net.**

---

During the week ending 19th June 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1059 living children, the deaths of 588 persons, and 412 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 552. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 9·0, and the death-rate (corrected) 12·0.

The birth-rate of the week is 0·9 less than in the previous week, and 2·6 below the average. The marriage-rate is 2·6 less than in the previous week, and 1·9 below the average. The death-rate is 0·2 more than in the previous week, but 0·8 below the average.

The weekly death-rate in the individual towns averaged 11·5, and varied from 16·0 in Kilmarnock, 15·4 in Ayr, and 15·2 in Falkirk, to 3·5 in Coatbridge, and 5·6 in Clydebank. Relatively high death-rates occurred in Hamilton (14·5), in Dundee and in Paisley (13·2), in Kirkcaldy (12·9), in Edinburgh (12·5), and in Glasgow (12·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 23, and are 3 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 5 from measles, 4 from scarlet fever, 7 from whooping-cough, 2 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 2 more, but those from measles, from whooping-cough, and from the diarrhoeas of childhood are each 1 fewer, and those from diphtheria are 2 fewer.

Deaths from influenza numbered 3, and are 1 more than in the previous week.

Deaths from respiratory diseases numbered 61, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 64, and those of persons of sixty-five and upwards 189. The former are 9 fewer than in the previous week, but the latter are 1 more.

Deaths attributed to violent causes numbered 27, and are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·6, being the same as that for the previous week, but 2°·1 below that for the corresponding week of last year. The mean rainfall was 0·62 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

WEEKLY RETURN  
OF  
Births, Deaths, and Marriages  
IN THE  
Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 25.      Week ending SATURDAY, JUNE 26, 1926.      Price 2d. net.

---

During the week ending 26th June 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1059 living children, the deaths of 554 persons, and 398 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 516. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 8·7, and the death-rate (corrected) 11·2.

The birth-rate of the week is the same as in the previous week, and is 1·4 below the average. The marriage-rate is 0·3 less than in the previous week, and 1·4 below the average. The death-rate is 0·8 less than in the previous week, and 1·4 below the average.

The weekly death-rate in the individual towns averaged 10·6, and varied from 15·4 in Ayr, 14·5 in Kilmarnock and 13·9 in Edinburgh, to 5·2 in Kirkcaldy, 6·1 in Falkirk and 6·6 in Hamilton. Relatively high death-rates occurred in Motherwell and Wishaw (12·5), in Dundee (12·3), and in Paisley (12·0). In Glasgow the death-rate was 10·6 and in Aberdeen 9·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 22, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 5 from measles, 3 from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 2 more and those from diphtheria are 1 more, but those from measles number the same, those from scarlet fever are 1 fewer and those from whooping-cough are 3 fewer.

Deaths from influenza numbered 5, and are 2 more than in the previous week.

Deaths from respiratory diseases numbered 59, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is the same as in the previous week, and is 0·3 below the average.

Deaths of children of less than one year old numbered 79, and those of persons of sixty-five and upwards 153. The former are 15 more than in the previous week, but the latter are 36 fewer.

Deaths attributed to violent causes numbered 18 and are 9 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·7, being 0°·1 above that for the previous week, but 1°·8 below that for the corresponding week of last year. The mean rainfall was 0·22 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

Note:—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which influenza was a contributory cause as well as those of which it was the sole cause.  
\* Cerebro-spinal meningitis.

WEEKLY RETURN  
OF  
**Births, Deaths, and Marriages**  
IN THE  
**Principal Towns of Scotland**

*By Authority of the Registrar-General*

---

**No. 26.      Week ending SATURDAY, JULY 3, 1926.      Price 2d. net.**

---

During the week ending 3rd July 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1056 living children, the deaths of 559 persons, and 485 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 519. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 10·6, and the death-rate (corrected) 11·3.

The birth-rate of the week is the same as in the previous week, but 1·9 below the average. The marriage-rate is 1·9 more than in the previous week, but 1·1 below the average. The death-rate is 0·1 more than in the previous week, but 1·0 below the average.

The weekly death-rate in the individual towns averaged 9·7, and varied from 12·7 in Glasgow, 12·6 in Aberdeen, and 12·6 in Paisley to 5·6 in Ayr, 6·3 in Perth and 7·6 in Falkirk. Relatively high death-rates occurred in Kirkcaldy (11·6), in Greenock (11·5), in Clydebank (11·3) and in Dundee (10·7).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34, and are 12 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from enteric fever, 8 from measles, 3 from scarlet fever, 4 from whooping-cough, 8 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 5 more, from the diarrhoeas of childhood 4 more, and from measles 3 more, while those from scarlet fever and from whooping-cough each number the same.

Deaths from influenza numbered 4, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 63, and equalled an annual death-rate from these causes of 1·4 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·2 below the average.

Deaths of children of less than one year old numbered 68, and those of persons of sixty-five and upwards 169. The former are 11 fewer than in the previous week, but the latter are 16 more.

Deaths attributed to violent causes numbered 27 and are 9 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 59°·4, being 3°·7 above that for the previous week, and 0°·2 above that for the corresponding week of last year. The mean rainfall was 0·13 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 27.      Week ending SATURDAY, JULY 10, 1926.      Price 2d. net.**

---

During the week ending 10th July 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1013 living children, the deaths of 553 persons, and 425 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 543. The equivalent annual birth-rate is 22·0 per thousand, the marriage-rate 9·2, and the death-rate (corrected) 11·8.

The birth-rate of the week is 1·0 less than in the previous week, and 2·2 below the average. The marriage-rate is 1·4 less than in the previous week, and 2·3 below the average. The death-rate is 0·5 more than in the previous week, but 0·4 below the average.

The weekly death-rate in the individual towns averaged 10·8, and varied from 19·7 in Falkirk and 16·2 in Aberdeen, to 5·2 in Motherwell and Wishaw and 5·6 in Clydebank. Relatively high death-rates occurred in Kirkcaldy (15·5), in Edinburgh (12·8), in Perth (12·7), in Glasgow (12·3), in Greenock (11·5), and in Dunfermline (11·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 18, and are 16 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from enteric fever, 6 from measles, 4 from scarlet fever, 2 from whooping-cough, 1 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 1 more, but those from measles are 2 fewer, from whooping-cough 2 fewer, from the diarrhoeas of childhood 6 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 7, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 50, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·3 less than in the previous week, and is 0·5 below the average.

Deaths of children of less than one year old numbered 67, and those of persons of sixty-five and upwards 189. The former are 1 fewer than in the previous week, but the latter are 20 more.

Deaths attributed to violent causes numbered 29, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·6, being 0°·8 below that for the previous week, and 0°·9 below that for the corresponding week of last year. The mean rainfall was 0·42 inch.

**NOTE.**— *The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

*By Authority of the Registrar-General*

---

**No. 28.      Week ending SATURDAY, JULY 17, 1926.      Price 2d. net.**

---

During the week ending 17th July 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 998 living children, the deaths of 546 persons, and 468 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 525. The equivalent annual birth-rate is 21·7 per thousand, the marriage-rate 10·2, and the death-rate (corrected) 11·4.

The birth-rate of the week is 0·4 less than in the previous week, and 1·8 below the average. The marriage-rate is 0·9 more than in the previous week, but 1·2 below the average. The death-rate is 0·4 less than in the previous week, and 0·4 below the average.

The weekly death-rate in the individual towns averaged 10·4, and varied from 16·0 in Kilmarnock and 15·0 in Paisley, to 1·5 in Falkirk, and 4·6 in Coatbridge. Relatively high death-rates occurred in Aberdeen (13·6), in Dundee (12·9), in Hamilton (11·8), in Glasgow (11·5), in Edinburgh (11·5), in Dunfermline (11·4) and in Perth (11·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 27, and are 9 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from enteric fever, 3 from measles, 4 from scarlet fever, 9 from whooping-cough, 1 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 7 more, and from the diarrhoeas of childhood 5 more, while those from scarlet fever and diphtheria each number the same, and those from measles are 3 fewer.

Deaths from influenza numbered 3, and are 4 fewer than in the previous week.

Deaths from respiratory diseases numbered 57, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·2 below the average.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 176. The former are 9 more than in the previous week, but the latter are 13 fewer.

Deaths attributed to violent causes numbered 30, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 64°·8, being 6°·2 above that for the previous week, and 3°·9 above that for the corresponding week of last year. It is the highest mean temperature recorded for any week since the week ending 26th August 1899. The mean rainfall was 0·00 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

During the week ending 24th July 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 991 living children, the deaths of 574 persons, and 821 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 541. The equivalent annual birth-rate is 21·6 per thousand, the marriage rate 17·9, and the death-rate (corrected) 11·8.

The birth-rate of the week is 0·1 less than in the previous week, and 1·9 below the average. The marriage-rate is 7·7 more than in the previous week, and 1·3 above the average. The death-rate is 0·4 more than in the previous week, and 0·2 above the average.

The weekly death-rate in the individual towns averaged 11·1, and varied from 17·1 in Hamilton and 16·9 in Clydebank, to 3·8 in Dunfermline and 7·8 in Paisley. Relatively high death-rates occurred in Glasgow (13·3), in Ayr (12·6), in Greenock (12·1), in Aberdeen (11·9), in Motherwell and Wishaw (11·8) and in Dundee (11·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29, and are 2 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from enteric fever, 2 from measles, 5 from scarlet fever, 6 from whooping-cough, 4 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 3 more, from the diarrhoeas of childhood 2 more, and from scarlet fever 1 more, while those from measles are 1 fewer, and from whooping-cough 3 fewer.

Deaths from influenza numbered 2, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 60, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·1 more than in the previous week, and is the same as the average.

Deaths of children of less than one year old numbered 71, and those of persons of sixty-five and upwards 174. The former are 5 fewer than in the previous week, and the latter are 2 fewer.

Deaths attributed to violent causes numbered 22, and are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·3, being 4°·5 below that for the previous week, and 2°·0 below that for the corresponding week of last year. The mean rainfall was 2·19 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 30.      Week ending SATURDAY, JULY 31, 1926.      Price 2d. net.**

---

During the week ending 31st July 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1049 living children, the deaths of 509 persons, and 440 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 478. The equivalent annual birth-rate is 22·8 per thousand, the marriage-rate 9·6, and the death-rate (corrected) 10·4.

The birth-rate of the week is 1·2 more than in the previous week, but 1·1 below the average. The marriage-rate is 8·3 less than in the previous week, and 5·0 below the average. The death-rate is 1·4 less than in the previous week, and 0·8 below the average.

The weekly death-rate in the individual towns averaged 10·5, and varied from 22·0 in Kirkcaldy and 14·3 in Perth, to 4·6 in Coatbridge and 6·0 in Paisley. Relatively high death-rates occurred in Motherwell and Wishaw (13·2), in Falkirk (12·1), in Edinburgh (11·5), in Clydebank (11·3), in Dundee (11·0), and in Aberdeen (10·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 21, and are 8 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from enteric fever, 2 from measles, 2 from scarlet fever, 8 from whooping-cough, 1 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 2 more, and from enteric fever 1 more, but those from measles number the same, while those from scarlet fever are 3 fewer, from diphtheria 3 fewer, and from the diarrhoeas of childhood 5 fewer.

Deaths from influenza numbered 1, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 40, and equalled an annual death-rate from these causes of 0·9 per thousand. This death-rate is 0·4 less than in the previous week, and is 0·4 below the average.

Deaths of children of less than one year old numbered 58, and those of persons of sixty-five and upwards 169. The former are 13 fewer than in the previous week, and the latter are 5 fewer.

Deaths attributed to violent causes numbered 29, and are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·7, being 1°·6 below that for the previous week, but 0°·9 above that for the corresponding week of last year. The mean rainfall was 0·19 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

WEEKLY RETURN  
OF  
**Births, Deaths, and Marriages**  
IN THE  
**Principal Towns of Scotland**

*By Authority of the Registrar-General*

---

No. 31.      Week ending SATURDAY, AUGUST 7, 1926.      Price 2d. net.

---

During the week ending 7th August 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 994 living children, the deaths of 523 persons, and 383 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 508. The equivalent annual birth-rate is 21·6 per thousand, the marriage-rate 8·3, and the death-rate (corrected) 11·1.

The birth-rate of the week is 1·2 less than in the previous week, and 1·0 below the average. The marriage-rate is 1·3 less than in the previous week, and 0·6 below the average. The death-rate is 0·7 more than in the previous week, but 0·1 below the average.

The weekly death-rate in the individual towns averaged 9·9, and varied from 15·0 in Paisley and 14·1 in Dundee, to 5·6 in Ayr and 6·1 in Falkirk. Relatively high death-rates occurred in Edinburgh (12·6), in Kirkcaldy (11·6), in Perth (11·1), in Glasgow (11·0), in Coatbridge (10·4), and in Clydebank (10·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 19, and are 2 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from enteric fever, 2 from measles, none from scarlet fever, 4 from whooping-cough, 1 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 5 more, but those from measles and diphtheria each number the same, while those from scarlet fever are 2 fewer, and from whooping-cough 4 fewer.

Deaths from influenza numbered 3, and are 2 more than in the previous week.

Deaths from respiratory diseases numbered 49, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·2 more than in the previous week, but is 0·1 below the average.

Deaths of children of less than one year old numbered 62, and those of persons of sixty-five and upwards 187. The former are 4 more than in the previous week, and the latter are 18 more.

Deaths attributed to violent causes numbered 33, and are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·1, being 1°·4 above that for the previous week, and 1°·6 above that for the corresponding week of last year. The mean rainfall was 0·62 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 32.      Week ending SATURDAY, AUGUST 14, 1926.      Price 2d. net.

---

During the week ending 14th August 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 947 living children, the deaths of 482 persons, and 292 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 461. The equivalent annual birth-rate is 20·6 per thousand, the marriage-rate 6·4, and the death-rate (corrected) 10·0.

The birth-rate of the week is 1·0 less than in the previous week, and 2·3 below the average. The marriage-rate is 1·9 less than in the previous week, and 0·8 below the average. The death-rate is 1·1 less than in the previous week, and 1·2 below the average.

The weekly death-rate in the individual towns averaged 9·4, and varied from 18·2 in Falkirk and 13·8 in Paisley to 4·2 in Ayr and 5·1 in Dunfermline. Relatively high death-rates occurred in Perth (12·7), in Dundee (12·6), in Aberdeen (10·9), and in Glasgow (10·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 22, and are 3 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 1 from measles, none from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 2 more, and from the diarrhoeas of childhood 2 more, but from whooping-cough they number the same, while from measles they are 1 fewer.

No deaths from influenza were registered during the week.

Deaths from respiratory diseases numbered 45, and equalled an annual death-rate from these causes of 1·0 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·2 below the average.

Deaths of children of less than one year old numbered 55, and those of persons of sixty-five and upwards 156. The former are 7 fewer than in the previous week, and the latter are 31 fewer.

Deaths attributed to violent causes numbered 19, and are 14 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·8, being 1°·3 below that for the previous week, and 1°·3 below that for the corresponding week of last year. The mean rainfall was 0·45 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 33.      Week ending SATURDAY, AUGUST 21, 1926.      Price 2d. net.**

---

During the week ending 21st August 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 896 living children, the deaths of 507 persons, and 291 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 487. The equivalent annual birth-rate is 19·5 per thousand, the marriage-rate 6·3, and the death-rate (corrected) 10·6.

The birth-rate of the week is 1·1 less than in the previous week, and 2·2 below the average. The marriage-rate is 0·1 less than in the previous week, and 0·4 below the average. The death-rate is 0·6 more than in the previous week, but 0·6 below the average.

The weekly death-rate in the individual towns averaged 10·5, and varied from 19·0 in Perth, and 13·2 in Dundee and in Paisley to 5·8 in Kilmarnock, and 6·6 in Hamilton. Relatively high death-rates occurred in Ayr (12·6), in Clydebank (12·4), in Greenock (11·5), and in Edinburgh (10·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 27, and are 5 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include 2 from enteric fever, none from measles, 2 from scarlet fever, 3 from whooping-cough, 3 from diphtheria, and 17 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 3 more, from enteric fever 2 more and from scarlet fever 2 more, but those from diphtheria number the same, while those from whooping-cough are 1 fewer.

No deaths from influenza were registered during the week.

Deaths from respiratory diseases numbered 36, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is 0·2 less than in the previous week, and is 0·5 below the average.

Deaths of children of less than one year old numbered 64, and those of persons of sixty-five and upwards 154. The former are 9 more than in the previous week, but the latter are 2 fewer.

Deaths attributed to violent causes numbered 27, and are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 59°·7, being 0°·9 above that for the previous week, and 1°·2 above that for the corresponding week of last year. The mean rainfall was 1·39 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 34.      Week ending SATURDAY, AUGUST 28, 1926.      Price 2d. net.**

---

During the week ending 28th August 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 965 living children, the deaths of 529 persons, and 295 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 515. The equivalent annual birth-rate is 21·0 per thousand, the marriage-rate 6·4, and the death-rate (corrected) 11·2.

The birth-rate of the week is 1·5 more than in the previous week, but 1·4 below the average. The marriage-rate is 0·1 more than in the previous week, but 0·9 below the average. The death-rate is 0·6 more than in the previous week, but 0·2 below the average.

The weekly death-rate in the individual towns averaged 10·9, and varied from 16·8 in Kirkcaldy and 13·5 in Dundee, to 6·9 in Coatbridge and 7·6 in Dunfermline. Relatively high death-rates occurred in Kilmarnock (13·1), in Ayr (12·6), in Falkirk (12·1), in Paisley (12·0), in Greenock (11·5), in Edinburgh (11·4), and in Glasgow (11·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 37, and are 10 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include none from enteric fever, 1 from measles, 6 from scarlet fever, 5 from whooping-cough, 5 from diphtheria, and 20 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 4 more, from the diarrhoeas of childhood 3 more, from whooping-cough 2 more, from diphtheria 2 more, and from measles 1 more.

Deaths from influenza numbered 3, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 52, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·3 more than in the previous week, but is the same as the average.

Deaths of children of less than one year old numbered 71, and those of persons of sixty-five and upwards 164. The former are 7 more than in the previous week, and the latter are 10 more.

Deaths attributed to violent causes numbered 26, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·0, being 1°·7 below that for the previous week, but 0°·9 above that for the corresponding week of last year. The mean rainfall was 0·20 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 35. Week ending SATURDAY, SEPTEMBER 4, 1926. Price 2d. net.**

---

During the week ending 4th September 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 950 living children, the deaths of 495 persons, and 399 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 477. The equivalent annual birth-rate is 20·7 per thousand, the marriage-rate 8·7, and the death-rate (corrected) 10·4.

The birth-rate of the week is 0·3 less than in the previous week, and 2·2 below the average. The marriage-rate is 2·3 more than in the previous week, and 0·7 above the average. The death-rate is 0·8 less than in the previous week, and 0·6 below the average.

The weekly death-rate in the individual towns averaged 9·8, and varied from 19·6 in Ayr and 13·7 in Falkirk, to 1·3 in Dunfermline, 4·8 in Perth and 6·6 in Aberdeen and in Hamilton. Relatively high death-rates occurred in Kirkcaldy (12·9), in Coatbridge (12·7), and in Dundee (12·6). In Glasgow this rate was 11·1, and in Edinburgh 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 31, and are 6 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from enteric fever, 1 from measles, none from scarlet fever, 1 from whooping-cough, 3 from diphtheria, and 26 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 6 more, but those from enteric fever and from measles number the same, those from diphtheria are 2 fewer, from whooping-cough 4 fewer, and from scarlet fever 6 fewer.

Deaths from influenza numbered 3, being the same as in the previous week.

Deaths from respiratory diseases numbered 48, and equalled an annual death-rate from these causes of 1·0 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·3 below the average.

Deaths of children of less than one year old numbered 66, and those of persons of sixty-five and upwards 168. The former are 5 fewer than in the previous week, but the latter are 4 more.

Deaths attributed to violent causes numbered 24, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·7, being 0°·3 below that for the previous week, but 4°·4 above that for the corresponding week of last year. The mean rainfall was 0·11 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 36. Week ending SATURDAY, SEPTEMBER 11, 1926. Price 2d. net.**

---

During the week ending 11th September 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 936 living children, the deaths of 523 persons, and 383 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 493. The equivalent annual birth-rate is 20·4 per thousand, the marriage-rate 8·3, and the death-rate (corrected) 10·7.

The birth-rate of the week is 0·3 less than in the previous week, and 1·8 below the average. The marriage-rate is 0·4 less than in the previous week, and 1·8 below the average. The death-rate is 0·3 more than in the previous week, but 0·8 below the average.

The weekly death-rate in the individual towns averaged 10·2, and varied from 16·0 in Kilmarnock and 14·0 in Ayr, to 5·3 in Hamilton and 7·0 in Greenock. Relatively high death-rates occurred in Glasgow (12·3), in Dunfermline (11·4), in Clydebank (11·3), in Perth (11·1), and in Kirkcaldy (10·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 35, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include none from enteric fever, 1 from measles, 3 from scarlet fever, 3 from whooping-cough, 7 from diphtheria, and 21 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 4 more, from scarlet fever 3 more, and from whooping-cough 2 more, but those from measles number the same, while those from the diarrhoeas of childhood are 5 fewer.

Deaths from influenza numbered 3, and are the same as in the previous week.

Deaths from respiratory diseases numbered 49, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 67, and those of persons of sixty-five and upwards 169. The former are 1 more than in the previous week, and the latter are 1 more.

Deaths attributed to violent causes numbered 22, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·7, being 1°·0 below that for the previous week, but 6°·0 above that for the corresponding week of last year. The mean rainfall was 0·90 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 37. Week ending SATURDAY, SEPTEMBER 18, 1926. Price 2d. net.**

---

During the week ending 18th September 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 889 living children, the deaths of 574 persons, and 372 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 532. The equivalent annual birth-rate is 19·3 per thousand, the marriage-rate 8·1, and the death-rate (corrected) 11·6.

The birth-rate of the week is 1·1 less than in the previous week, and 2·7 below the average. The marriage-rate is 0·2 less than in the previous week, and 0·4 below the average. The death-rate is 0·9 more than in the previous week, but 0·7 below the average.

The weekly death-rate in the individual towns averaged 11·0, and varied from 18·1 in Kirkcaldy, 16·0 in Kilmarnock and 14·0 in Ayr, to 2·5 in Dunfermline, 6·8 in Clydebank, and 8·8 in Motherwell and Wishaw. Relatively high death-rates occurred in Paisley (13·8), in Aberdeen (13·6), in Dundee (13·2), and in Glasgow (12·3). In Edinburgh the death-rate was 9·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 36, and are 1 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include none from enteric fever, 1 from measles, 5 from scarlet fever, 4 from whooping-cough, 5 from diphtheria, and 21 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 2 more and from whooping-cough 1 more, but those from enteric fever, from measles and from the diarrhoeas of childhood each number the same, while those from diphtheria are 2 fewer.

Deaths from influenza numbered 1, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 49, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is the same as in the previous week, but is 0·3 below the average.

Deaths of children of less than one year old numbered 88, and those of persons of sixty-five and upwards 186. The former are 21 more than in the previous week, and the latter are 17 more.

Deaths attributed to violent causes numbered 25, and are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·7, being the same as that for the previous week, but 3°·9 above that for the corresponding week of last year. The mean rainfall was 0·87 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 38. Week ending SATURDAY, SEPTEMBER 25, 1926. Price 2d. net.**

---

During the week ending 25th September 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 992 living children, the deaths of 578 persons, and 445 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 551. The equivalent annual birth-rate is 21·6 per thousand, the marriage rate 9·7, and the death-rate (corrected) 12·0.

The birth-rate of the week is 2·3 more than in the previous week, but 1·0 below the average. The marriage-rate is 1·6 more than in the previous week, and 0·7 above the average. The death-rate is 0·4 more than in the previous week, and 0·4 above the average.

The weekly death-rate in the individual towns averaged 12·2, and varied from 17·3 in Coatbridge, 16·8 in Ayr and 15·8 in Perth, to 5·1 in Dunfermline, 8·7 in Kilmarnock and 10·3 in Kirkcaldy. Relatively high death-rates occurred in Greenock (15·3), in Paisley (13·2), in Dundee (12·9), and in Aberdeen (12·9). In Edinburgh this rate was 12·3 and in Glasgow 11·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 35, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include 3 from enteric fever, none from measles, 3 from scarlet fever, 1 from whooping-cough, 4 from diphtheria, and 24 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from enteric fever and from the diarrhoeas of childhood are each 3 more, while those from measles and from diphtheria are each 1 fewer, from scarlet fever 2 fewer and from whooping-cough 3 fewer.

Deaths from influenza numbered 4, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 62, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·2 more than in the previous week, but is 0·2 below the average.

Deaths of children of less than one year old numbered 80, and those of persons of sixty-five and upwards 169. The former are 8 fewer than in the previous week, and the latter are 17 fewer.

Deaths attributed to violent causes numbered 23, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·0, being 3°·7 below that for the previous week, but 4°·0 above that for the corresponding week of last year. The mean rainfall was 1·28 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 39.    Week ending SATURDAY, OCTOBER 2, 1926.    Price 2d. net.**

---

During the week ending 2nd October 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 972 living children, the deaths of 575 persons, and 471 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 537. The equivalent annual birth-rate is 21·1 per thousand, the marriage rate 10·2, and the death-rate (corrected) 11·7.

The birth-rate of the week is 0·5 less than in the previous week, and 1·8 below the average. The marriage-rate is 0·5 more than in the previous week, but 0·4 below the average. The death-rate is 0·3 less than in the previous week, and 0·7 below the average.

The weekly death-rate in the individual towns averaged 10·3, and varied from 15·6 in Dundee and 13·7 in Falkirk, to 5·6 in Ayr and 7·3 in Kilmarnock. Relatively high death-rates occurred in Greenock (13·4), in Glasgow (13·0), in Aberdeen (11·6), and in Coatbridge (11·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 35, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include 2 from enteric fever, 1 from measles, 3 from scarlet fever, 1 from whooping-cough, 4 from diphtheria, and 24 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 1 more but those from enteric fever are 1 fewer, while those from scarlet fever, whooping-cough, diphtheria and the diarrhoeas of childhood each number the same.

Deaths from influenza numbered 3, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 65, and equalled an annual death-rate from these causes of 1·4 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·3 below the average.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 161. The former are 23 more than in the previous week, but the latter are 8 fewer.

Deaths attributed to violent causes numbered 23, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·1, being 0°·9 below that for the previous week, and 1°·7 below that for the corresponding week of last year. The mean rainfall was 1·87 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 40.      Week ending SATURDAY, OCTOBER 9, 1926.      Price 2d. net.**

---

During the week ending 9th October 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1054 living children, the deaths of 552 persons, and 371 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 531. The equivalent annual birth-rate is 22·9 per thousand, the marriage rate 8·1, and the death-rate (corrected) 11·6.

The birth-rate of the week is 1·8 more than in the previous week, but 0·8 below the average. The marriage-rate is 2·1 less than in the previous week, and 1·6 below the average. The death-rate is 0·1 less than in the previous week, and 0·1 below the average.

The weekly death-rate in the individual towns averaged 10·5, and varied from 16·7 in Falkirk and 14·1 in Dundee, to 4·8 in Perth and 5·2 in Kirkcaldy. Relatively high death-rates occurred in Dunfermline (14·0), in Paisley (13·8), in Coatbridge (12·7), in Edinburgh (12·2), in Glasgow (11·8), in Clydebank (11·3), and in Greenock (10·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 21, and are 14 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 1 from measles, 2 from scarlet fever, 2 from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from whooping-cough are 1 more, and from diphtheria 1 more, but from measles they number the same, while from scarlet fever they are 1 fewer, and from the diarrhoeas of childhood 13 fewer.

Deaths from influenza numbered 2, and are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 63, and equalled an annual death-rate from these causes of 1·4 per thousand. This death-rate is the same as in the previous week, and is 0·3 below the average.

Deaths of children of less than one year old numbered 81, and those of persons of sixty-five and upwards 175. The former are 22 fewer than in the previous week, but the latter are 14 more.

Deaths attributed to violent causes numbered 33, and are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·5, being 3°·4 above that for the previous week, and 4°·2 above that for the corresponding week of last year. The mean rainfall was 1·32 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 41. Week ending SATURDAY, OCTOBER 16, 1926. Price 2d. net.**

---

During the week ending 16th October 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 947 living children, the deaths of 561 persons, and 258 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 524. The equivalent annual birth-rate is 20·6 per thousand, the marriage rate 5·6, and the death-rate (corrected) 11·4.

The birth-rate of the week is 2·3 less than in the previous week, and 2·8 below the average. The marriage-rate is 2·5 less than in the previous week, and 1·4 below the average. The death-rate is 0·2 less than in the previous week, and 0·4 below the average.

The weekly death-rate in the individual towns averaged 10·5, and varied from 18·2 in Falkirk and 14·4 in Dundee, to 4·5 in Clydebank and 4·6 in Coatbridge. Relatively high death-rates occurred in Aberdeen (14·2), in Kirkcaldy (14·2), in Edinburgh (12·2), in Paisley (11·4), in Glasgow (11·3), in Ayr (11·2), and in Perth (11·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 25, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 3 from enteric fever, none from measles, 1 from scarlet fever, none from whooping-cough, 3 from diphtheria, and 18 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 7 more and from enteric fever 3 more, while those from scarlet fever are 1 fewer, and from diphtheria 2 fewer.

Deaths from influenza numbered 6, and are 4 more than in the previous week.

Deaths from respiratory diseases numbered 54, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·2 less than in the previous week, and is 0·5 below the average.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 161. The former are 8 fewer than in the previous week, and the latter are 14 fewer.

Deaths attributed to violent causes numbered 24, and are 9 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·3, being 11°·2 below that for the previous week, but 1°·3 above that for the corresponding week of last year. The mean rainfall was 1·41 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 42. Week ending SATURDAY, OCTOBER 23, 1926. Price 2d. net.**

---

During the week ending 23rd October 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 1055 living children, the deaths of 554 persons, and 274 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 525. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 6·0, and the death-rate (corrected) 11·4.

The birth-rate of the week is 2·4 more than in the previous week, but 0·9 below the average. The marriage-rate is 0·4 more than in the previous week, but 0·3 below the average. The death-rate is the same as in the previous week, but 1·5 below the average.

The weekly death-rate in the individual towns averaged 10·5, and varied from 19·0 in Perth and 13·8 in Dundee, to 3·7 in Motherwell and Wishaw and 5·6 in Ayr. Relatively high death-rates occurred in Hamilton (13·2), in Kilmarnock (13·1), in Glasgow (12·2), in Edinburgh (11·1), and in Greenock (10·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 17, and are 8 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from enteric fever, none from measles, 1 from scarlet fever, none from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 2 more, while from scarlet fever they number the same, and from the diarrhoeas of childhood 7 fewer.

Deaths from influenza numbered 4, and are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 64, and equalled an annual death-rate from these causes of 1·4 per thousand. This death-rate is 0·2 more than in the previous week, but is 0·5 below the average.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 183. The former are the same as in the previous week, but the latter are 22 more.

Deaths attributed to violent causes numbered 22, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·5, being 6°·8 below that for the previous week, and 11°·5 below that for the corresponding week of last year. The mean rainfall was 0·36 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

---

**No. 43. Week ending SATURDAY, OCTOBER 30, 1926. Price 2d. net.**

---

During the week ending 30th October 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 943 living children, the deaths of 665 persons, and 266 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 632. The equivalent annual birth-rate is 20·5 per thousand, the marriage-rate 5·8, and the death-rate (corrected) 13·8.

The birth-rate of the week is 2·5 less than in the previous week, and 1·8 below the average. The marriage-rate is 0·2 less than in the previous week, and 0·8 below the average. The death-rate is 2·4 more than in the previous week, and 0·8 above the average.

The weekly death-rate in the individual towns averaged 13·1, and varied from 19·0 in Dundee and 15·3 in Greenock to 9·5 in Perth and 10·2 in Dunfermline. Relatively high death-rates occurred in Falkirk (15·2), in Aberdeen (14·6), in Kilmarnock (14·5), in Glasgow (13·6), in Clydebank (13·6), in Edinburgh (13·5), and in Hamilton (13·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 32, and are 15 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include 1 from enteric fever, none from measles, 4 from scarlet fever, 4 from whooping-cough, 6 from diphtheria, and 17 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 6 more, from whooping-cough 4 more, from scarlet fever 3 more, from enteric fever 1 more, and from diphtheria 1 more.

Deaths from influenza numbered 9, and are 5 more than in the previous week.

Deaths from respiratory diseases numbered 96, and equalled an annual death-rate from these causes of 2·1 per thousand. This death-rate is 0·7 more than in the previous week, and is the same as the average.

Deaths of children of less than one year old numbered 116, and those of persons of sixty-five and upwards 232. The former are 43 more than in the previous week, and the latter are 49 more.

Deaths attributed to violent causes numbered 12, and are 10 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 36°·3, being 1°·2 below that for the previous week, and 14°·5 below that for the corresponding week of last year. The mean rainfall was 1·54 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 44. Week ending SATURDAY, NOVEMBER 6, 1926. Price 2d. net.**

---

During the week ending 6th November 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 939 living children, the deaths of 741 persons, and 356 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 727. The equivalent annual birth-rate is 20·4 per thousand, the marriage rate 7·7, and the death-rate (corrected) 15·8.

The birth-rate of the week is 0·1 less than in the previous week, and 1·2 below the average. The marriage-rate is 1·9 more than in the previous week, but 0·2 below the average. The death-rate is 2·0 more than in the previous week, and 3·1 above the average.

The weekly death-rate in the individual towns averaged 14·0, and varied from 19·2 in Aberdeen and 18·2 in Ayr, to 5·1 in Dunfermline and 6·8 in Clydebank. Relatively high death-rates occurred in Motherwell and Wishaw (17·7), in Kilmar-nock (17·4), in Kirkcaldy (16·8), in Glasgow (16·6), in Edinburgh (16·6), in Dundee (15·9), in Coatbridge (15·0) and in Paisley (14·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 22, and are 10 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from enteric fever, 1 from measles, 4 from scarlet fever, 2 from whooping-cough, 3 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 1 more, but those from enteric fever and from scarlet fever number the same, while from whooping-cough they are 2 fewer, from diphtheria 3 fewer, and from the diarrhoeas of childhood 6 fewer.

Deaths from influenza numbered 4, and are 5 fewer than in the previous week.

Deaths from respiratory diseases numbered 166, and equalled an annual death-rate from these causes of 3·6 per thousand. This death-rate is 1·5 more than in the previous week, and is 1·4 above the average.

Deaths of children of less than one year old numbered 133, and those of persons of sixty-five and upwards 263. The former are 17 more than in the previous week, and the latter are 31 more.

Deaths attributed to violent causes numbered 25, and are 13 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·8, being 3°·5 above that for the previous week, but 5°·8 below that for the corresponding week of last year. The mean rainfall was 1·75 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 45. Week ending SATURDAY, NOVEMBER 13, 1926. Price 2d. net.**

---

During the week ending 13th November 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 969 living children, the deaths of 745 persons, and 242 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 698. The equivalent annual birth-rate is 21·1 per thousand, the marriage rate 5·3, and the death-rate (corrected) 15·2.

The birth-rate of the week is 0·7 more than in the previous week, but 1·2 below the average. The marriage-rate is 2·4 less than in the previous week, and 1·5 below the average. The death-rate is 0·6 less than in the previous week, but 1·5 above the average.

The weekly death-rate in the individual towns averaged 13·2, and varied from 20·3 in Clydebank and 18·8 in Edinburgh, to 5·1 in Dunfermline and 6·6 in Hamilton. Relatively high death-rates occurred in Falkirk (18·2), in Dundee (18·1), in Paisley (16·8), in Ayr (16·8), in Glasgow (15·3), and in Kilmarnock (14·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 22, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from enteric fever, 1 from measles, 2 from scarlet fever, 2 from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 2 more, but those from enteric fever, from measles, from whooping-cough, and from the diarrhoeas of childhood number the same, while from scarlet fever they are 2 fewer.

Deaths from influenza numbered 8, and are 4 more than in the previous week.

Deaths from respiratory diseases numbered 157, and equalled an annual death-rate from these causes of 3·4 per thousand. This death-rate is 0·2 less than in the previous week, but is 0·9 above the average.

Deaths of children of less than one year old numbered 95, and those of persons of sixty-five and upwards 278. The former are 38 fewer than in the previous week, but the latter are 15 more.

Deaths attributed to violent causes numbered 20, and are 5 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·0, being 2°·2 above that for the previous week, and 6°·4 above that for the corresponding week of last year. The mean rainfall was 1·40 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 46. Week ending SATURDAY, NOVEMBER 20, 1926. Price 2d. net.**

---

During the week ending 20th November 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 921 living children, the deaths of 724 persons, and 232 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 680. The equivalent annual birth-rate is 20·0 per thousand, the marriage-rate 5·0, and the death-rate (corrected) 14·8.

The birth-rate of the week is 1·1 less than in the previous week, and 2·7 below the average. The marriage-rate is 0·3 less than in the previous week, and 0·3 below the average. The death-rate is 0·4 less than in the previous week, and 0·5 below the average.

The weekly death-rate in the individual towns averaged 13·7, and varied from 20·3 in Dunfermline, 19·8 in Greenock, and 19·7 in Falkirk, to 7·0 in Ayr, 7·8 in Kirkcaldy, and 7·9 in Perth. Relatively high death-rates occurred in Aberdeen (17·5), in Kilmarnock (16·0), in Edinburgh (15·8), in Glasgow (15·3), in Clydebank (14·7), and in Coatbridge (13·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 21, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from enteric fever, 2 from measles, 4 from scarlet fever, 2 from whooping-cough, 6 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 2 more, from measles 1 more, and from diphtheria 1 more, but those from enteric fever and from whooping-cough number the same, while from the diarrhoeas of childhood they are 5 fewer.

Deaths from influenza numbered 11, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 153, and equalled an annual death-rate from these causes of 3·3 per thousand. This death-rate is 0·1 less than in the previous week, but is 0·1 above the average.

Deaths of children of less than one year old numbered 105, and those of persons of sixty-five and upwards 245. The former are 10 more than in the previous week, but the latter are 33 fewer.

Deaths attributed to violent causes numbered 30, and are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·6, being 0°·6 above that for the previous week, and 6°·6 above that for the corresponding week of last year. The mean rainfall was 1·91 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 47. Week ending SATURDAY, NOVEMBER 27, 1926. Price 2d. net.**

---

During the week ending 27th November 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 936 living children, the deaths of 695 persons, and 247 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 653. The equivalent annual birth-rate is 20·4 per thousand, the marriage-rate 5·4, and the death-rate (corrected) 14·2.

The birth-rate of the week is 0·4 more than in the previous week, but 2·1 below the average. The marriage-rate is 0·4 more than in the previous week, but 0·2 below the average. The death-rate is 0·6 less than in the previous week, and 2·7 below the average.

The weekly death-rate in the individual towns averaged 12·4, and varied from 16·5 in Dunfermline, and 15·5 in Glasgow, to 5·8 in Kilmarnock, and 7·8 in Kirkcaldy. Relatively high death-rates occurred in Dundee (15·3), in Paisley (15·0), in Edinburgh (14·5), in Ayr (14·0), in Greenock (13·4), in Hamilton (13·2), in Coatbridge (12·7), and in Perth (12·7).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 19, and are 2 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from enteric fever, 1 from measles, 1 from scarlet fever, 2 from whooping-cough, 7 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 2 more, and from diphtheria 1 more, but those from whooping-cough number the same, while from measles they are 1 fewer, and from scarlet fever 3 fewer.

Deaths from influenza numbered 3, and are 8 fewer than in the previous week.

Deaths from respiratory diseases numbered 145, and equalled an annual death-rate from these causes of 3·2 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·7 below the average.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 225. The former are 2 fewer than in the previous week, and the latter are 20 fewer.

Deaths attributed to violent causes numbered 20, and are 10 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·0, being 2°·6 below that for the previous week, but 4°·2 above that for the corresponding week of last year. The mean rainfall was 0·50 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

## WEEKLY RETURN

OF

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 48. Week ending SATURDAY, DECEMBER 4, 1926. Price 2d. net.**

---

During the week ending 4th December 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 946 living children, the deaths of 695 persons, and 301 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 671. The equivalent annual birth-rate is 20·6 per thousand, the marriage rate 6·5, and the death-rate (corrected) 14·6.

The birth-rate of the week is 0·2 more than in the previous week, but 1·5 below the average. The marriage-rate is 1·1 more than in the previous week, and 0·1 above the average. The death-rate is 0·4 more than in the previous week, but 2·6 below the average.

The weekly death-rate in the individual towns averaged 12·6, and varied from 20·6 in Perth and 19·3 in Dundee, to 2·5 in Dunfermline and 6·8 in Clydebank. Relatively high death-rates occurred in Glasgow (16·0), in Hamilton (15·8), in Aberdeen (14·9), in Kilmarnock (14·5), in Paisley (13·8), in Edinburgh (13·5), and in Greenock (12·8).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 32, and are 13 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from enteric fever, 1 from measles, 4 from scarlet fever, 3 from whooping-cough, 16 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 9 more, from scarlet fever 3 more, and from whooping-cough 1 more, while those from measles and from the diarrhoeas of childhood each number the same.

Deaths from influenza numbered 10, and are 7 more than in the previous week.

Deaths from respiratory diseases numbered 136, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is 0·2 less than in the previous week, and is 1·4 below the average.

Deaths of children of less than one year old numbered 106, and those of persons of sixty-five and upwards 246. The former are 3 more than in the previous week, and the latter are 21 more.

Deaths attributed to violent causes numbered 19, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·8, being 2°·2 below that for the previous week, but 4°·0 above that for the corresponding week of last year. The mean rainfall was 0·59 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

**No. 49. Week ending SATURDAY, DECEMBER 11, 1926. Price 2d. net.**

---

During the week ending 11th December 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 931 living children, the deaths of 742 persons, and 251 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 685. The equivalent annual birth-rate is 20·3 per thousand, the marriage-rate 5·5, and the death-rate (corrected) 14·9.

The birth-rate of the week is 0·3 less than in the previous week, and 1·8 below the average. The marriage-rate is 1·0 less than in the previous week, and 1·4 below the average. The death-rate is 0·3 more than in the previous week, but 3·2 below the average.

The weekly death-rate in the individual towns averaged 12·6, and varied from 16·8 in Glasgow and 15·9 in Dundee, to 8·8 in Motherwell and Wishaw and 9·2 in Hamilton. Relatively high death-rates occurred in Edinburgh (14·7), in Kirkcaldy (14·2), in Dunfermline (14·0), in Aberdeen (13·6), and in Paisley (13·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 25, and are 7 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 1 from measles, 6 from scarlet fever, 4 from whooping-cough, 9 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from scarlet fever are 2 more, and from whooping-cough 1 more, but those from measles number the same, while from the diarrhoeas of childhood they are 3 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 10, and are the same as in the previous week.

Deaths from respiratory diseases numbered 152, and equalled an annual death-rate from these causes of 3·3 per thousand. This death-rate is 0·3 more than in the previous week, but is 1·4 below the average.

Deaths of children of less than one year old numbered 98, and those of persons of sixty-five and upwards 259. The former are 8 fewer than in the previous week, and the latter are 13 more.

Deaths attributed to violent causes numbered 30, and are 11 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·8, being 7°·0 above that for the previous week, and 5°·9 above that for the corresponding week of last year. The mean rainfall was 0·28 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 50. Week ending SATURDAY, DECEMBER 18, 1926. Price 2d. net.**

---

During the week ending 18th December 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 947 living children, the deaths of 694 persons, and 267 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 669. The equivalent annual birth-rate is 20·6 per thousand, the marriage rate 5·8, and the death-rate (corrected) 14·6.

The birth-rate of the week is 0·3 more than in the previous week, but 2·0 below the average. The marriage-rate is 0·3 more than in the previous week, but 0·2 below the average. The death-rate is 0·3 less than in the previous week, and 2·3 below the average.

The weekly death-rate in the individual towns averaged 14·3, and varied from 25·0 in Hamilton and 20·6 in Perth, to 7·9 in Clydebank and 10·6 in Falkirk. Relatively high death-rates occurred in Dundee (16·5), in Kirkcaldy (15·5), in Glasgow (14·9), in Kilmarnock (14·5), and in Edinburgh (14·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 21, and are 4 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from enteric fever, 3 from measles, 4 from scarlet fever, 3 from whooping-cough, 8 from diphtheria, and 3 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from measles are 2 more, but those from whooping-cough are 1 fewer, from diphtheria 1 fewer, from scarlet fever 2 fewer, and from the diarrhoeas of childhood 2 fewer.

Deaths from influenza numbered 6, and are 4 fewer than in the previous week.

Deaths from respiratory diseases numbered 161, and equalled an annual death-rate from these causes of 3·5 per thousand. This death-rate is 0·2 more than in the previous week, but is 0·6 below the average.

Deaths of children of less than one year old numbered 124, and those of persons of sixty-five and upwards 214. The former are 26 more than in the previous week, but the latter are 45 fewer.

Deaths attributed to violent causes numbered 32, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·4, being 4°·4 below that for the previous week, but 5°·9 above that for the corresponding week of last year. The mean rainfall was 0·38 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

## WEEKLY RETURN

OF

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

No. 51. Week ending SATURDAY, DECEMBER 25, 1926. Price 2d. net.

During the week ending 25th December 1926 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 865 living children, the deaths of 612 persons, and 314 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 566. The equivalent annual birth-rate is 18·8 per thousand, the marriage rate 6·8, and the death-rate (corrected) 12·3.

The birth-rate of the week is 1·8 less than in the previous week, and 3·1 below the average. The marriage-rate is 1·0 more than in the previous week, but 0·1 below the average. The death-rate is 2·3 less than in the previous week, and 3·9 below the average.

The weekly death-rate in the individual towns averaged 12·6, and varied from 19·0 in Perth and 18·5 in Coatbridge to 8·9 in Dunfermline and 9·1 in Kirkcaldy and in Falkirk. Relatively high death-rates occurred in Paisley (16·8), in Kilmarnock (14·5), in Dundee (14·1), in Hamilton (13·2), and in Glasgow (13·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 23, and are 2 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from enteric fever, 3 from measles, 5 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from the diarrhoeas of childhood are 3 more, from enteric fever 1 more, from scarlet fever 1 more, and from whooping-cough 1 more, but those from measles number the same, while from diphtheria they are 4 fewer.

Deaths from influenza numbered 9, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 117, and equalled an annual death-rate from these causes of 2·5 per thousand. This death-rate is 1·0 less than in the previous week, and is 1·0 below the average.

Deaths of children of less than one year old numbered 107, and those of persons of sixty-five and upwards 170. The former are 17 fewer than in the previous week, and the latter are 44 fewer.

Deaths attributed to violent causes numbered 17, and are 15 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 35°·4, being 5°·0 below that for the previous week, but 5°·8 above that for the corresponding week of last year. The mean rainfall was 0·06 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

# **WEEKLY RETURN**

OF

# **Births, Deaths, and Marriages**

IN THE

## **Principal Towns of Scotland**

*By Authority of the Registrar-General*

---

**No. 52. Week ending SATURDAY, JANUARY 1, 1927. Price 2d. net.**

---

During the week ending 1st January 1927 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,396,600, the births of 928 living children, the deaths of 793 persons, and 776 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 744. The equivalent annual birth-rate is 20·2 per thousand, the marriage-rate 16·9, and the death-rate (corrected) 16·2.

The birth-rate of the week is 1·4 more than in the previous week, but 1·1 below the average. The marriage-rate is 10·1 more than in the previous week, but 1·7 below the average. The death-rate is 3·9 more than in the previous week, but 0·8 below the average.

The weekly death-rate in the individual towns averaged 16·1, and varied from 26·6 in Coatbridge and 22·2 in Perth, to 9·2 in Hamilton and 12·0 in Paisley. Relatively high death-rates occurred in Kirkcaldy (18·1), in Dundee (17·8), in Motherwell and Wishaw (16·9), in Greenock (16·6), in Glasgow (16·5), and in Edinburgh (16·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 28, and are 5 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include 1 from enteric fever, 4 from measles, 3 from scarlet fever, 4 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the number in the previous week, deaths from diphtheria are 4 more, from the diarrhoeas of childhood 2 more, and from measles 1 more, but those from enteric fever and from whooping-cough each number the same, while from scarlet fever they are 2 fewer.

Deaths from influenza numbered 12, and are 3 more than in the previous week.

Deaths from respiratory diseases numbered 175, and equalled an annual death-rate from these causes of 3·8 per thousand. This death-rate is 1·3 more than in the previous week, and is 0·2 above the average.

Deaths of children of less than one year old numbered 144, and those of persons of sixty-five and upwards 246. The former are 37 more than in the previous week, and the latter are 76 more.

Deaths attributed to violent causes numbered 35, and are 18 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·8, being 8°·4 above that for the previous week, and 4°·2 above that for the corresponding week of last year. The mean rainfall was 0·15 inch.

*NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the three preceding years.*

Note:—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which influenza was a contributory cause as well as those of which it was the sole cause.

\* Cerebro-spinal meningitis.
